E- Admit is one of our flagship online application software that helps Institution to manage their entire admission process including candidate management, online payment acceptance, automated merit list generation, and completing the complex admission processes at zero cost to the Institute. The cost is shared by the applicants (students) in the most economical way, so as to minimize the burden over them too. For each application done online, the candidate pays a nominal processing fee over the application fee set by the Institute for the course he/she is applying to.

E- Admit has an in-built payment gateway through which the students may pay through their Credit/Debit Cards, ATM Cards, Internet Banking or Wallets. E-Admit can be simply integrated with your existing website, if you have. Further, the system manages the entire students data centrally, and provides MIS Reports to Management for effective decision making process.
